Environment Policy

In our day and age environmental issues are the responsibility of us all. At CJP we take this responsibility very seriously, we are committed to reducing the impact our business has on the environment.

To do so we have taken the following steps:

1. We where ever-possible use recycled stationery in our office.
2. We use recycled pallets
3. We work hand in hand with AMF Polymers to collect and recover waste plastic for recycling.
4. We assess our suppliers in order to ensure that their manufacturing standards meet the standards set out in ISO: 1400.
5. We are committed to providing materials that are approved in the RoHS standard.

We are always open to discussing any concerns that our customers may have and introducing improvements to our policy, which is reviewed annually.
